RealCapture

A New Interface to Reality

Never let reality slip away. Turn moments into actions.

AI Glasses + Lobster AI Agent

2026 Product Brochure

Core Philosophy

Second Layer of Memory

AI glasses continuously capture sounds, visuals, conversations, and context from your real world. It serves as a secondary memory storage beyond your brain, ensuring important moments and information are never lost.

Second Layer of Execution

The Lobster AI Agent understands everything you record, intelligently extracts to-do items, and automatically advances follow-up actions. It transforms your thoughts into actual execution power, turning reality into action.

A New Interface to Reality

This is not a toy, but a brand new way to connect you with the real world. It seamlessly integrates into daily life, allowing technology to truly serve fundamental human needs.

"Don't let reality slip away. Let reality become power."

Dual Engine Architecture

Perception Layer + Intelligence Layer, Working in Harmony

AI Glasses

Perception Layer

- High-fidelity audio capture
- Scene visual recognition
- Real-time voice transcription
- Context-aware recording
- All-day battery life
- Lightweight comfortable design

Lobster Agent

Intelligence Layer

- Deep semantic understanding
- Intelligent content summarization
- Automatic task extraction
- Proactive execution advancement
- Continuous learning evolution
- Multi-platform integration

Perceive Reality > Understand Content > Execute Actions

Four Core Capabilities

01

Full-Scene Capture

Meetings, lectures, daily conversations, spontaneous ideas - capture every important moment in life anytime, anywhere. Never worry about forgetting again.

02

Intelligent Understanding

Deep semantic analysis based on large language models, accurately grasping content essence, speaker intent, and potential action needs.

03

Task Extraction

Automatically identify to-do items, commitments, and follow-up tasks from conversations and records, generating structured actionable task lists.

04

Seamless Execution

Connect to calendar, email, notes, project management tools to achieve full automation from recording to action.

From Field to Action

Complete the Loop in Four Steps

01

Capture

Record Reality

AI glasses passively record scenes, sounds, and conversations. No manual operation needed, naturally integrated into life.

02

Understand

Deep Analysis

Lobster processes all captured content, identifying people, topics, and potential intentions.

03

Organize

Extract Key Points

Automatically extract key insights, action items, decisions, and matters requiring follow-up.

04

Execute

Advance Actions

Sync to calendar, create notes, set reminders, transform insights into completed tasks.

Use Cases

Business Meetings

Auto-record meeting content, extract action items

Learning & Lectures

Capture knowledge points, generate study notes

Daily Conversations

Remember important promises, never forget agreeme

Creative Ideas

Capture spontaneous inspiration, organize idea library

Medical Consultations

Accurately record prescriptions, safeguard health info

Professional Services

Record client interactions, generate meeting minutes
